Site Time: 3 weeks

City Campus – Sunderland College:

- £29m build incorporating:
 - Training Kitchens
 - Restaurant Kitchens
 - 80-seater restaurant
 - 2000 students across 5 disciplines

Corsair was approached by one of its leading distributors to work with them in the tendering process for the high-profile brand new City Campus for Sunderland College, the latest and most advanced of its four campus sites.

Involvement at the outset was key to the successful conclusion of the project, ensuring that the Vortex Atlantic Ceiling formed an integral part of the structure of the training kitchens. The integrated extraction, fresh air and lighting solution effectively did away with the requirement for a suspended ceiling and all associated costs.

The Atlantic Ceiling's innovative design of commonly-sized panels for lighting, fresh air, extract and plain tiles provides unique flexibility in the world of ventilated ceilings. Having to reconfigure the cookline and room layout needs no longer to be viewed as a daunting and costly task.

With the supply of integrated SDUs, wall cupboards and rodged shelves in addition to the Atlantic Ceiling and the Cobra ventilation canopies, Corsair had a major part to play in the successful delivery of this prestigious facility.

Call Corsair to see how we can use our broad portfolio of solutions to help with your next project.
